## Item 051 SPOTTED / DROPPED TRAILERS - UNLOADING

When Carrier drops its trailer(s) at Consignee's facility for the purpose of Consignee unloading such trailer(s) and Carrier leaves the trailer(s) unattended during such unloading process, or when Carrier's personnel is denied access to the dock to witness the off load, the following procedures will govern Carrier's handling of said shipments.

1. Carrier will provide a signed/dated copy of the Delivery Receipt for each shipment said to be loaded on the trailer(s).
2. Carrier will clearly mark each Delivery Receipt with "Spotted Trailer" and "Trailer Number".
3. Consignee (Receiver) will provide the Carrier a counter signed signed/dated Delivery Receipt/s at the time the trailer is dropped.
4. Carrier will consider all freight as "Delivered Clear", without written notification from the Consignee (Receiver) of exceptions within 24 hours of the trailer/s being dropped. In the event of damage exceptions, the Consignee will also provide supporting photos.
5. Any exception noted by the Consignee (Receiver) and reported to the Carrier within the specified time limits, will be the responsibility of the Carrier, with the exception of Shipper Load Count (SLC) trailers as referenced below.
6. Exceptions not reported by the Consignee or not reported by the Consignee within the specified time limits, will be the responsibility of the Consignee and no claim will be filed against the Carrier.
7. Shipper Loaded Trailers (SLC): If the Carrier does not off-load the freight and it stays on board the trailer from the Shipper's origin facility to the consignee's facility, liability for shortage or damage will be with the Shipper and no claim will be filed against the Carrier.
8. In the event a claim is filed with the Carrier, the following procedures will govern:
  - a. Per NMFC Item 300140 the carrier has a right to inspect the product and the packaging to determine the extent of damage and carrier liability. The Consignee is to provide supporting photos in all instances of reported damage. In instances of damage valued over \$500.00, the Carrier may at its discretion require an "Independent Third Party Inspection".
  - b. In accordance with NMFC Item 300150: All damage freight & original packaging must be retained by the consignee and/or claimant in the same apparent condition as was tendered at the time of delivery until further notification or acceptance of liability is received from the carrier. If carrier liability is determined, disposal provision will be given to the consignee and/or claimant. Upon acceptance of full carrier liability, damage freight becomes the property of the carrier to salvage and/or to dispose of accordingly.
  - c. Cargo claims must be filed within nine (9) months from date of delivery or in the event of loss, within nine (9) months of expected delivery date.

## Item 052 SPOTTED / DROPPED TRAILERS – LOADING (SHIPPER LOAD & COUNT - SL&C)

When Carrier drops its trailer(s) at Shipper's facility for the purpose of Shipper loading such trailers and Carrier leaves the trailer(s) unattended during such loading process, the following procedures will govern Carrier's handling of said shipments.

1. All shipments loaded on Carrier's trailer(s) will be considered Shipper Load & Count (SL&C) to the first check point of the Carrier.
  - a. First check point may be the local service center of the Carrier or may be the Breakbulk Service Center or the Destination Service Center if the shipment is not off loaded.
2. Carrier's driver, when picking up the loaded trailer, will secure the Bills of Lading for each shipment said to be loaded on the trailer(s) by the Shipper.
  - a. The Bills of Lading will be signed SL&C by the Carrier with the dated Bill of Lading indicating the date of said pickup.
3. Upon arrival of the trailer(s) at Carrier's origin service center, the freight off-loaded, will be checked for condition by the Carrier and counted as to pieces (securely wrapped, banded or otherwise secured pallets will not be counted as pieces but will be considered said to contain (stc) the number of cartons indicated by the Shipper). Any exception in the condition of the shipment(s) or piece count will be recorded on the Carrier's Local Unit Exception Report and emailed/faxed back to the Shipper within twenty-four (24) hours of unloading, excluding weekends and holidays.

Any exception noted by the Carrier and reported to the Shipper within the specified time limits, will be the responsibility of the Shipper. Any exception noted by the consignee but not reported by the Carrier or not reported by the Carrier within the specified time limits, will be the responsibility of the Carrier, with the exception of left on trailer (LOT) shipments.

Carrier will retain the email/fax confirmation as proof of notification of the exception report by the shipper. If verbal request for exceptions are made by the Shipper, Carrier will follow up by email/fax and retain the email/fax confirmation as proof of notification.

4. Any shipments that are LOT (not off-loaded or checked as to condition or piece count by the Carrier's origin service center) are to be reported to the Shipper as such, along with the exception information being furnished from the first check point service center. The first check point on an LOT could be the breakbulk or destination service center.
5. If the Carrier does not off-load the freight and it stays on board the trailer from the Shipper's origin facility to the consignee's facility, the following liability provisions will govern:
  - a. If Carrier's driver stays with the trailer during the time the trailer is being unloaded, the liability for shortage or damage will be with the shipper.
  - b. If the trailer is dropped at the consignee's facility for unloading by the consignee, the Carrier will require a clear delivery receipt before the trailer is dropped.
6. When Carrier has more than one trailer report to submit to Shipper, Carrier will submit each trailer report separately. In the event there are no exceptions, the Carrier's exception report will show trailer number, date of pick up and the notation "no exceptions". If the Carrier fails to submit an exception report, the Shipper will assume there were no exceptions.
7. In the event there are discrepancies, Carrier will report the type of exception by trailer number, date of unloading and the pro number assigned to the shipment. Where possible, the Bill of Lading number will also be included on the exception report.
  - a. Overages will be held by carrier until shipper furnishes disposition. However, if no disposition is received in five (5) working days, the freight will be returned to the Shipper on a deadhead freight bill.
  - b. From time to time, the Carrier may elect to take digital photographs of damaged shipments and/or poor loading by the Shipper to assist with our Avoidance and Prevention Program.
8. Concealed damages discovered by the consignee must be handled in accordance with items 300135, 300140, 300145, 300150 and 300155 of the National Motor Freight Classification (NMFC).
  - a. Each concealed damage will be handled on its own merits.
  - b. In addition to declining such claims, the Carrier may elect to present a compromise settlement offer as determined by the investigation.

## Item 052 SPOTTED / DROPPED TRAILERS – LOADING (SHIPPER LOAD & COUNT - SL&C) (Cont'd)

- c. In order to be considered for a compromise settlement offer by the carrier the following will be necessary:
1. Concealed damage must be reported to the carrier within five (5) days of delivery by the Carrier.
  2. All packaging must be retained in the event the Carrier has a need to review the packaging.
  3. The shipment cannot have had any additional transportation after delivery by the Carrier.
  4. There is no visual evidence of damage to the shipping container that should have been detected at time of delivery.

All payments on services provided by Oak Harbor Freight Lines are due from customer within 30 days of original invoice date. The pro # and amount paid for each pro # must be referenced on the remittance information. Should amount charged by Oak Harbor Freight Lines be disputed, customer should pay amount their records indicate is owed Oak Harbor Freight Lines, and submit documentation with payment explaining why freight charges were short paid. All pricing and rates are based on payment by cash, check, ACH or wire, unless otherwise stated in the pricing agreement.

## Item 058 APPLICATION / DETERMINATION OF RULES, RATES, CHARGES AND/OR CLASSES

### 1. Density On Mixed Shipments:

For purposes of determining density on mixed shipments where each pallet/commodity is not individually itemized with corresponding weights on the bill of lading, Oak Harbor Freight Lines will add all the dimensions of all pieces/handling units/pallets where class is determined by density and divide into the total weight of these pieces in order to determine an average weighted density. Average weighted density will be used to determine applicable class for mixed shipments where commodities and weights are not clearly defined on bill of lading. Shipments that consist of differently classed items and one or more handling units that have been inspected and whose class is derived wholly or in part by the use of density will be classed at the total density of the shipment.

### 2. Default Classification / Unidentifiable Freight:

In the event a shipment is inadvertently accepted for which NMF 100 series item number(s) are not provided or cannot be established using the description on the bill of lading and/or the shipment was not inspected by carrier, a default class of 150 shall be used to rate the shipment. Should said shipment be scanned by carrier's dimensioning technology, a density based class shall be applied based upon density guidelines contained in Item 059. Upon satisfactory proof of the actual class, an adjustment shall be made.

### 3. Pallet Rates:

For purposes of determining pallet rate application, unless otherwise stated in the Pricing Agreement, the maximum weight per pallet shall be 2,000 lbs, the maximum length, width and height dimensions shall be 48 x 48 x 48 inches, applies only on outbound prepaid and applies only to direct points. When a pallet exceeds the weight and/or dimension maximums, an additional pallet charge will apply. When the total weight of a pallet rate shipment is more than double the max pallet weight, an additional pallet charge will apply each time a multiple of the max pallet weight is surpassed (i.e. a single pallet shipment at 2201 lbs with a max pallet weight of 1100 lbs. would equal 3 pallets or 3 times the pallet rate). Should a loose piece be tendered with a pallet, which is subject to pallet rates, the loose piece will be charged as an additional pallet.

### 4. "Bumping Rule":

This rule allows the shipper at time of shipment, to artificially inflate the weight of a shipment in order to obtain one lower class. A reference to Item 171 from a full scale density provision in the NMF 100 Series (National Motor Freight Classification) must exist for the specific commodity. The result of "bumping" to the next lower class cannot implement a negotiated FAK. The class "bumped" to would be the next lowest actual class.

### 5. Accessorial And Additional Charge Application:

Accessorials and additional charges will be assessed based upon the rules contained in this publication, when requested/required by the Shipper/Consignee/3<sup>rd</sup> party and/or when service is performed by Carrier personnel. Oak Harbor Freight Lines often uses electronic means (i.e. handheld units, electronic timestamps, wireless communication, etc.) to capture data/information used to access accessorial and additional charges. The lack of notations on the delivery receipt is not an indication an accessorial or additional service was not performed and is not an acceptable reason for non-payment. Statements on bills of lading attempting to exempt parties from accessorial or additional charges or requests for notification approval will not be recognized or honored.

### 6. Definition of Truckload (Volume) Moves:

Truckload (volume) moves are defined as shipments weighing 20,000 lbs. or greater, shipments specifically designated as pupload or truckload, shipments loaded to full visible capacity, shipments subject to linear foot minimum or shipments with application of the cubic capacity and/or density rule.

**Item 058 APPLICATION / DETERMINATION OF RULES, RATES, CHARGES AND/OR CLASSES (cont'd)**

**7. Return Freight:**

For negotiated return pricing to apply, the original Oak Harbor Freight Lines pro number the freight originally moved under must be referenced.

**8.** Additional services performed / requested may affect standard transit times.

**9. Prepayment or Guarantee of Charges:**

1. A **prepaid** shipment is one on which the charges for transportation service rendered at the request of the consignor, including charges for any accessorial services performed are to be paid by the shipper. When the status of the bill of lading states prepaid and bill to party is the same as the consignee name, carrier shall change status of bill of lading from prepaid to collect for the purpose of collecting freight charges.
2. A **collect** shipment is one which the charges for transportation service rendered at the request of the consignee, including accessorial services performed, are to be paid by the consignee.
3. A shipment on which charges are to be paid by a party other than the consignor or consignee will be accepted provided that the consignor has established credit with the carrier picking up the shipment at origin and guarantees to pay the charges if the third party fails to do so. Such a shipment will not be accepted if the consignor executes Section 7 of the bill of lading. When the party, other than consignor or consignee, fails to pay the freight charges within the time allowed, the carrier will have recourse to collect charges from consignor whether Section 7 of the bill of lading is endorsed or not.
